Limitless Adaptability

The highly adaptive Agiloft engine allows you to easily modify and extend the system to automate business processes without the need for programming. You can define an unlimited number of custom workflows, business rules, groups, teams, tables, fields and relationships. You can configure the system to satisfy your exact needs, using just your browser; and entire new functions can be added and related seamlessly to the out-of-the-box tables in just a few hours.

The entire interface is in your control with your choice of colours, fonts, logo, and text, and you can create entirely custom interfaces using the end user portal template engine. Over 70% of the brain is devoted to visual processing, so why not make your important customers feel at home by providing a look and feel that dynamically adapts based on their login?

Thanks to the sophisticated security model, your staff, customers, partners, suppliers and affiliates can access the information appropriate for them 24/7 with full security, and you can enjoy a 360 degree view of your business. The system supports unlimited custom groups and provides fine grained access control down to the record and field level for complete process and data access control.
